Faculty of Technology and Management – the gateway to your international future

Our faculty offers an international study environment where exchange students can choose courses from all our study programmes within business and management, language and communication, industrial and mechanical engineering, IT engineering and computer science.

We cooperate with a large number of international partners within the Erasmus and Nordplus exchange programmes. This means that you have the possibility to spend one or two semesters at our faculty – you even have the possibility to obtain a double-diploma. Getting a double diploma means that you will have both a diploma from your home university and a Danish diploma from Vitus Bering.

Courses offered in English

You can choose courses within all of the above-mentioned study areas. You will find a detailed course catalogue in our website. Choosing courses you must take care that your home university will transfer the credits you obtain at Vitus Bering.

We focus on project-oriented tuition in small study groups and class tuition. We strongly recommend our students to make a project as this gives them a good idea of real-life work. Often the projects are carried out in cooperation with companies. Our class-tuition is highly appreciated by all our students due to the informal and friendly relationship between students and teachers.

Application procedures

Please visit our website: www.vitusbering.com. Click Application on the Exchange Programmes in English menu and follow the procedure. For further information please don't hesitate to contact our international coordinator, Ms. Lise Hjerrild, lh@vitusbering.dk.

Accommodation

Exchange students at Vitus Bering are guaranteed accommodation provided by our Student Service department. Kindly visit our website. You will find Student Service in the top menu.

Campus

We welcome you in our recently renovated campus with modern facilities: a large canteen area, new library, bookshop, modern laboratories, innovation centre, internet-café, wireless internet connection and student house. The campus is situated in beautiful surroundings close to Horsens Fjord.

Elena, Universidad Politécnica de Valencia, ES

"Hi students! I am Elena, a Spanish IT-student from Valencia. I have come to study in Vitus Bering twice. Yes, twice!! First I didn't know too much about Vitus Bering. I just wanted to get good experiences, improve my English and work in a foreign environment and all wasn't like I expected - it was even more!!! Now I am here to get a double diploma. This means that when I finish the studies I will have both a Spanish diploma and a Danish too. More diplomas, more opportunities!!!

I will always recommend studying abroad for different reasons: you work actively with other international or Danish students, the lessons are really practical and useful, the teachers are very friendly and the staff from the international department is very helpful. You meet people from many countries; you enjoy a lot doing activities, having parties, visiting the country.

I have made really good friends here with different nationalities and I will keep them forever! The university is placed in a very nice environment, really close to the fjord. It offers new laboratories, computer rooms and a lot of facilities for the students. So, what are you waiting for? Come and join us!!

**Anna, Gdansk University of
Technology, PL**

"I have chosen Vitus Bering because it is a good university which was recommended by my Polish coordinator. I read some information on the web site which sounded very interesting.

Studying at an international university improves our general knowledge and English language. It is also a challenge to work with other nationalities. We get to know not only each other, but also other cultures and religions. The way the teachers run the lessons is really great. It is very nice to work when you do not feel a pressure from teachers. They treat students as friends which helps to build good relationships and make us feel more comfortable. I have recommended Vitus Bering to some of my friends and they are coming here next semester. I think that being here is a big challenge that everyone should try. It is worth coming here to check your ability to cooperate with people from different countries.

Nicolas, University of Paul Sabatier, Toulouse, FR

"I come from France and I chose to study at Vitus Bering because of the presentation that a teacher from Vitus Bering gave at my university. I thought it would be interesting to study in a country I didn't know – and also in a brand new university building. The studying conditions are very good and there is a good atmosphere between all international students."

Szabolcs, Budapest University, HU

"The best thing at Vitus Bering is the project work. This is why I wanted to come here – the experience of the international teamwork. I have met some teachers with whom I really enjoy working. Because of their open-minded and positive way of thinking I get far more than I expected to learn. I will recommend this university and the subjects with these teachers to all my fellow students at my faculty."

Lauri, Hame Polytechnic, FI

"For me Vitus Bering has been a different kind of school than I'm used to. In this University College studies are more project based and concentrate on individual thinking. All together I think that this system is very good for getting the best out of people. I chose Vitus Bering because it was our cooperation school in Finland and I knew from people that had studied here that it is a good quality school.

The school has very nice premises and almost everything is new here. Also the school network system is modern and students can use the course materials from the Fronter-system. It has been a very nice surprise for me that the English level in this school is very good. For me this school has been a very good experience and I can recommend it to my fellow students back in Finland."

**Rafal Robert and Rafal,
University of Rzeszów, PL**

"We chose Vitus Bering because a friend recommended it. We found a lot of information about Vitus Bering on the school website. You work in international teams (project groups). It is a good experience and chance to improve language skills. We like the study system, because here you can learn how to do something in practice, how to solve problems, create new business and how to communicate with people from all over the world. If you want to improve English language, meet a lot of people from all over Europe this school is the best place for you. Really nice atmosphere and really friendly people – these are the things which make this school very attractive!"

Ronald, Avans Hoogeschool, NL

"Vitus Bering is a very trendy school with a lot of opportunities. You can enter the school 24 hours a day. The education is on the same level as in Holland. The teachers are very friendly and open-minded. I recommend Vitus Bering to other international students, because of its way of supporting students. They really take care of you."

Lina and Neringa, Siauliai University, LT

"We chose Vitus Bering because our friend, who had been studying here previously, recommended it. And now we want to recommend it to other students, because it is a very good university. We have met a lot of nice, tolerant people and experienced quite different ways of life."

We really like studying here because here we have more practical things. We can choose the subjects that we want and the dialogue between students and teachers is equal. For other students we recommend taking the opportunity of studying here and experience everything on their own."

"Andreea, Transilvania University of Brasov, RO

"I am from Romania and I heard about this university from my teachers. Many of our teachers studied here or they have been guest lecturers here for some weeks during an academic year. What I find amazing about Vitus Bering is the fact that all the materials for the classes are posted online. This helps me to know everything about my classes, my course schedule and my tuition.

Another good thing is the student card that allows me to enter the university when I want to. From the library I can borrow every book that I need. I live with 2 other students who are not from my country. I am happy for it because I have new friends here from all over Europe.

Things that I also love here: small classes and group work, access to the university when I want, friendly students, helpful staff, the canteen where I can eat healthy food, various activities that promote interaction among all the students, the town."

Facts about Horsens and Denmark
