

The Research Centre of the Faculty of Economics
cordially invites you to a research seminar
on Thursday, **18th December 2014** at **12 p.m.** in room **P-109** at the
Faculty of Economics, University of Ljubljana

Author: **Jure Erjavec, PhD, Teaching Assistant, FELU**

Coauthor: **Peter Trkman, PhD, Associate Professor, FELU**

Coauthor: **Aleš Groznik, PhD, Full Professor, FELU**

will present the article:

**"The trade-off between road and railroad freight transport
– cost benefit analysis for Slovenia"**

“The choice of transportation mode for freight transport has a profound effect on logistics companies, infrastructure providers and society as a whole. The efficiency of freight transport is important because of its effect on several economic and environmental factors. The paper analyses the costs difference between railroad and road freight transport. The stakeholder analysis is used to enable the identification of the interests of various groups. The government is identified as the focal stakeholder. The governmental decision support model that focuses on the Slovenian case of road and railway freight transport is proposed. The proposed model can serve the government with its decision-making process when adopting policies that concern road and railroad transport such as subsidies or increased road tolls in order to promote railroad transport.”

You can register for the free seminar by phone (01) 58-92-490, or via e-mail:
research.seminars@ef.uni-lj.si by Wednesday, 17th December 2014.

We look forward to seeing you!
