

## Raziskovalni center Ekonomske fakultete

organizira znanstveno - raziskovalni seminar,  
ki bo v **ponedeljek 27. oktobra 2014**, ob **12:30 uri**  
v **P-108 na Ekonomski fakulteti v Ljubljani**.

Predstavljen bo članek:

### **“A Smart City Is A Collaborative Community: Lessons From Smart Aarhus”**

*avtor: prof. dr. Charles C. Snow, Smeal College of Business,  
Pennsylvania State University*

“The seminar will show the process of theory development and application in the field of organization design. It will first describe how the "actor-oriented" theoretical framework was developed, resulting in a description and explanation of the "architecture of collaboration" (Fjeldstad, Snow, Miles & Lettl, 2012). The actor-oriented framework will then be applied to Smart Aarhus, the smart city initiative of Aarhus, Denmark, begun in 2010. This application of theory to practice produces a set of ideas and recommendations that designers, managers, and policymakers can use in the creation of future smart cities (Snow, Obel, and Hakansson, 2014)”

Na brezplačni seminar se lahko prijavite v Službi za znanstveno raziskovalno delo,  
po telefonu (01) 58-92-490, ali po e-pošti [research.seminars@ef.uni-lj.si](mailto:research.seminars@ef.uni-lj.si), in sicer do  
nedelje, 26. 10. 2014

**Vljudno vabljeni!**
