Author:

Aleksandar Nikolovski

PhD candidate at

University of Ljubljana, School of Economics and Business

will present the article:

DETERMINANTS OF COUNTRY LEVEL EMPLOYEE OVERQUALIFICATION: A CONFIGURATIONAL APPROACH

We build on the configurational approach to identify configurational patterns leading to high country-level employee overqualification. We differentiate between subjective and objective employee overqualification and establish that each is caused by a different set (and configuration) of macro factors. In addition, we find that a country's non-vocational education system is a necessary condition for high objective employee overqualification.

Please register for the free seminar at <http://raziskave.ef.uni-lj.si/a/920>.
